

TECHNICAL DATA SHEET

TECHIBOND™ ADHESIVE – E420

DESCRIPTION & USES:

Techibond™ E420 is a water-based adhesive which may be used for mounting photographs, printed materials, artwork, labelling, lining shelves with paper, cardboard, cork, felt, fabrics, and many other household materials requiring only light bond strength. Bonds can be either permanent or temporary depending on application technique.

PROPERTIES:

- Appearance: Opaque milky white emulsion.
- Viscosity: Brushable liquid.
- Specific Gravity: Approx. 1.1.

METHOD OF APPLICATION:

- Techibond E420 can be brushed, or roller applied.
- On porous surfaces, coat only one surface then press both surfaces together immediately while adhesive is still wet.
- On non-porous surfaces, coat surface and allow approximately 5 minutes, then press together. Time of drying is dependent on ambient temperature and amount of adhesive applied.

Note: Additional information on physical properties, health hazards, storage, handling, and transport is available in the Safety Data Sheet (SDS).
